

ERITAS YANG

PERSONAL INFORMATION

Name:	Eritas Yang 杨晴	Address:	08 Peyton Hall, 4 Ivy Lane, Princeton, NJ 08544
Email:	eritas.yang@princeton.edu	Homepage:	https://eritasy.github.io/
ORCID:	 orcid.org/0009-0005-2641-1531		

RESEARCH INTERESTS

- Planetary dynamics: evolution of planetary systems; chaos, resonances, and dynamical instabilities.
- Exoplanet formation and evolution: dynamical pathways shaping close-in planets.
- Exoplanet system architecture: inferring unseen companions from transit timing variations, radial velocities, astrometry, and imaging.

EDUCATION

Graduate Student , Department of Astrophysical Sciences, Princeton University, U.S.A.	Aug 2024 – Present
Advisor: Joshua N. Winn	
BACHELOR OF SCIENCE , Department of Physics, Harvey Mudd College, U.S.A.	Sept 2020 – May 2024
Major: Physics GPA: 3.93/4.00	
Thesis: <i>Modulating the stability boundary: secular dynamics of compact three-planet systems</i>	
Advisor: Daniel Tamayo	

REFERENCES

HONORS AND AWARDS

Centennial Fellowship, Princeton University	
American Physical Society LeRoy Apker Award	Oct 2024
Thomas B. Brown Memorial Award, Harvey Mudd College	May 2024
Midlin Prize, Harvey Mudd College	May 2024

TALKS AND PRESENTATIONS

Invited talk, Exoplanet Lunch, CfA, Harvard	Feb 2026
Talk, International Conference on Exoplanets and Planet Formation (EPF), Shanghai, China	Dec 2025
<i>Eccentricity cascade: a new dynamical pathway to form misaligned hot Jupiters</i>	
Talk, The Chesapeake Bay Area Exoplanet Meeting (CHEXO), John Hopkins Applied Physics Laboratory	Dec 2025
Talk, AAS Division on Dynamical Astronomy Meeting (DDA 56), Atlanta, Georgia	May 2025
<i>A second M dwarf companion to the retrograde hot Jupiter HAT-P-7b: new dynamical implications for formation</i>	
Talk, AAS Division on Dynamical Astronomy Meeting (DDA 55), Toronto, Canada	May 2024
<i>Modulating the stability boundary: secular dynamics of compact three-planet systems</i>
